Data Analyst

Description

A Data Scientist collects, processes, and analyzes large datasets to extract meaningful insights and support business decision-making. The role involves using statistical methods, machine learning, and data visualization techniques to solve complex business problems and predict future trends.

Responsibilities

- Collect, clean, and organize structured and unstructured data
- Develop and apply machine learning models and statistical analyses
- Identify patterns, trends, and insights from data
- Build dashboards and data visualizations for reporting
- Work with business teams to solve data-driven problems
- Communicate findings in a clear and actionable way

Key Skills:

- Python / R / SQL
- Machine Learning & Statistics
- Data Visualization tools (Power BI / Tableau)
- Strong analytical and problem-solving skills

Experience

- Data analytics: 2 years (Preferred)
