Statistician

Description

We're seeking an experienced and detail-oriented **Senior Statistician** to join our analytics and research team. In this role, you'll leverage your statistical expertise to design studies, analyze complex datasets, and provide actionable insights that guide strategic decisions. You'll work closely with cross-functional teams, mentor junior analysts, and contribute to data-driven innovation across the organization.

Responsibilities

- Design and execute statistical analyses for experimental, observational, and survey data.
- Develop and validate predictive and inferential models using advanced statistical techniques (regression, ANOVA, Bayesian methods, time-series, etc.).
- Perform exploratory data analysis (EDA) to identify trends, patterns, and key drivers of outcomes.
- Collaborate with data engineers and scientists to ensure data quality, accuracy, and consistency.
- Provide statistical consultation to business, product, and research teams, translating technical results into clear, actionable insights.
- Prepare technical reports, visualizations, and presentations for both technical and non-technical audiences.
- Mentor junior statisticians and data analysts, promoting best practices in statistical modeling and data interpretation.

Qualifications

- Master's or Ph.D. in **Statistics, Applied Mathematics**, or a related field.
- **5–6 years** of hands-on experience in applied statistics, data analysis, or quantitative research.
- Mandate – Strong command of statistical software and programming languages such as **R, SPSS, AMOS, MPLus, SAS, Mathematica, or Stata**
- Proficiency in **SPSS, AMOS, MPLus, STATA, R, etc**
- Solid understanding of **hypothesis testing, sampling methods, experimental design, regression modeling, and multivariate analysis**.
- Excellent problem-solving, analytical thinking, and communication skills.
- Ability to work independently and manage multiple projects in a fast-paced environment.

Experience

- Statistical analysis: 3 years (Required)
